Workshop Content

Day One

02

Foundations & Strategy

The focus is on the "Why" and the "Core."

- Concepts: Introduction to Industry 4.0 and the "Intelligent Enterprise."
- The Digital Core: A deep dive into SAP S/4HANA, explaining the shift from legacy ECC systems to in-memory computing and simplified data models.
- Business Processes: How to integrate end-to-end cycles like Procure-to-Pay and Order-to-Cash.

Day Two

02

Technology & Innovation

The focus shifts to the "How" and the "Tools" beyond the core ERP.

- Platform Power: Exploration of SAP BTP (Business Technology Platform) for integration and extensions.
- Intelligence: Utilizing AI, Machine Learning, and RPA for predictive maintenance and automation.
- Data & UX: Using SAP Datasphere and Analytics Cloud for insights, while ensuring a modern user experience via SAP Fiori.
- Ecosystem: Overview of specialized solutions like SuccessFactors (HR)

Day Three

03

Execution & Value

The focus concludes with the "When" and "Success Metrics."

- Migration Path: Comparing Greenfield (new start) vs. Brownfield (conversion) strategies.
- Methodology: Using the SAP Activate framework to manage the project lifecycle.
- Best Practices: Emphasizing the "Clean Core" principle (minimizing customization) and managing organizational change.
- Final Output: Delegates build a tangible Digital Transformation Roadmap and business case.
